

# Proofpoint Mobile Solutions

## Anywhere, Anytime Access to Proofpoint

Proofpoint Mobile is a family of mobile solutions that extends the accessibility of Proofpoint enterprise features from desktops to mobile devices, all without compromising an organization's security and compliance. As workers in the enterprise become increasingly mobile, it is important to give them anywhere-access to their data and applications to maximize productivity. Proofpoint Mobile provides tools for both the end users and IT, with support for all mobile device types through either native or HTML applications. Proofpoint's mobile applications include Mobile Encryption, Mobile Archive, and Mobile Dashboard.

### Proofpoint Mobile Encryption

- One-click decryption on mobile devices with decrypt assist, enabling any recipient to quickly read encrypted messages from their mobile device
- Plug-in for BlackBerry users allows for easy encryption of messages

### Proofpoint Mobile Archive

- Self-service tool that extends Proofpoint Enterprise Archive to iPhone users, allowing for search anytime-anywhere
- Provides seamless email search across multi-year archive

### Proofpoint Mobile Dashboard

- Instant access to vital security information, including security updates
- View cluster/deployment stats
- Easy management of support portal
- Designed with admins and IT personnel in mind

## Proofpoint Extends Solutions with Mobility

Organizations worldwide use Proofpoint's solutions to protect against spam and viruses, safeguard privacy, encrypt sensitive information and archive messages for easier management and electronic discovery. A subset of these solutions are now extended to mobile applications using Proofpoint Connect, a set of APIs that provide secure web-based interfaces to the Proofpoint CloudControl platform.

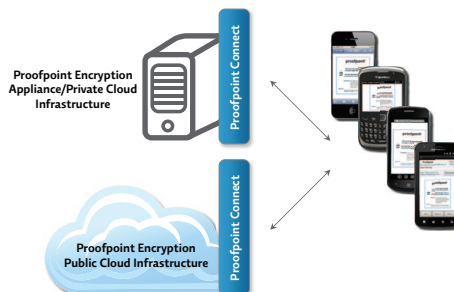

### Mobile Encryption

Proofpoint Encryption™, a part of the Proofpoint Enterprise Privacy™ Suite, offers powerful, policy-driven encryption features that mitigate the risks associated with regulatory violations, data loss and corporate policy violations. Proofpoint Mobile Encryption is an extension of Proofpoint Encryption, streamlining the user experience for reading encrypted messages from a mobile device.

#### Decryption

The decrypt assist feature in Proofpoint Mobile Encryption utilizes a pull decryption method in contrast to Proofpoint Encryption for desktops which utilizes push decryption, providing recipients with one-click access to encrypted messages and offering the same seamless experience as a desktop client, but with the anywhere-access advantage of mobile phones. Sending encrypted messages is a worry-free experience, as decrypt assist is compatible with any mobile device that has a web browser.

Decrypt assist enables one-click access to read encrypted messages on mobile devices and is available on Proofpoint appliance and cloud deployments:

#### Encryption

A BlackBerry encryption plug-in is an additional component of Proofpoint Mobile Encryption, providing users with the ability to tag emails for encryption from within their BlackBerry device. The plug-in requires no configuration by end-users and adds a "Send Securely" menu item on the mail compose screen for easy encryption.

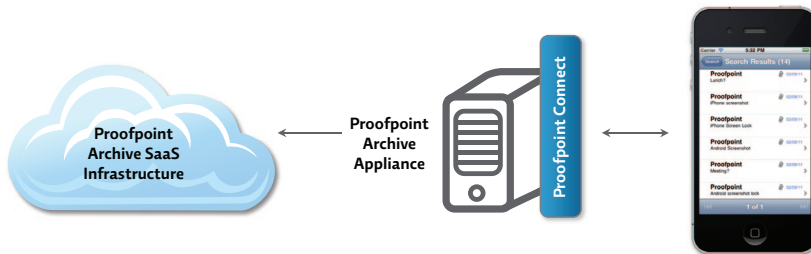

# Proofpoint Mobile Solutions

## Mobile Archive

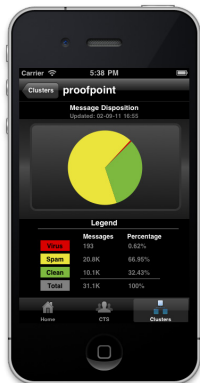

Proofpoint Enterprise Archive™ is an on-demand email archiving solution that addresses eDiscovery, regulatory compliance and email storage management, helping reduce legal discovery risk and costs. By providing a secure, searchable repository of all email messages, Proofpoint Enterprise Archive enables organizations to easily and consistently perform early case assessments, instantly preserve data in active legal holds and enforce email retention policies.

Proofpoint Mobile Archive, an extension of Proofpoint Enterprise Archive, is an iPhone application that boosts productivity for Proofpoint Enterprise Archive users by enabling access to their information from anywhere. As a self-service tool, the application enables end-users to search their email archive directly from their iPhone so that they can quickly find messages, view message details, and retrieve messages to their inbox. Proofpoint Mobile Archive also has the ability to search for emails dating back to the beginning of a user's email history (as far as the retention period allows), effectively making the application an infinite inbox right in the user's pocket.

Proofpoint Mobile Archive securely communicates with an organization's on-premises Proofpoint Enterprise Archive appliance, which in turn, queries the Proofpoint Archive SaaS infrastructure and relays data back to Proofpoint Mobile Archive:

To download Proofpoint Mobile Archive for your iPhone, visit the Apple App Store and search for "Proofpoint Mobile Archive."

## Mobile Dashboard

Proofpoint Mobile Dashboard is a companion tool for IT staff that are managing or implementing Proofpoint's powerful protection solution, Proofpoint Enterprise Protection™.

The Proofpoint Mobile Dashboard iPhone application provides instant access to Proofpoint security and Call Tracking System (CTS) information. Using the Proofpoint Mobile Dashboard, an administrator can view Proofpoint's global spam detection effectiveness, get the latest status of their Proofpoint CTS support tickets, and view their clusters' message disposition from the last 24 hours – broken down by virus, spam, and clean categories. To download Proofpoint Mobile Dashboard for your iPhone, visit the Apple App Store and search for "Proofpoint Mobile Dashboard."

## Device Support

Proofpoint Mobile is designed to be flexible with the wide array of mobile device deployments in today's enterprises and is compatible with the following platforms:

Mobile Application	Type	iPhone	BlackBerry	Android	Windows Phone 7
<b>Mobile Encryption</b>					
• Decrypt Assist	HTML	■	■	■	■
• BlackBerry Plug-In	Native		■		
<b>Mobile Archive</b>	Native	■			
<b>Mobile Dashboard</b>	Native	■			

## Proofpoint Mobile Solutions Benefits

- Empower end users with mobile access to Proofpoint data and tools
- Provides an organization with maximum flexibility in device deployment, supporting key mobile platforms
- Increased productivity for employees and administration with access from anywhere

## About Proofpoint

Proofpoint focuses exclusively on the art and science of cloud-based email security, eDiscovery and compliance solutions. Organizations around the world depend on Proofpoint's expertise, patented technologies and on-demand delivery system to protect against spam and viruses, safeguard privacy, encrypt sensitive information, and archive messages for easier management and discovery. Proofpoint's enterprise email solutions mitigate the challenges and amplify the benefits of enterprise messaging.
